

Sulzer

outline

knowdledge -> search & sharable knowdlege:

- z.b. organisatorisch: wo ist ein Hotel in der Nähe?
- ist das Produkt noch in Ordnung? Bzw. wie kläre ich es ab?

-> knowdledge often there but not at the right place (since they are at remote locations)

vision: platform für...

- welches wissen existiert wo?
- wissen speichern, durchsuchen & teilen
- verbesserung und feedback ermöglichen
- smartphone basiert, jedoch ohne ständig nötige internetverbindung
- multilanguage

ideas

- image recognition
- nlp
- annotating images fast -> annotate so that it is searchable
- local chache / store if there is no internet connection, as soon as connection is back up -> send it
- dirty hands / gloves -> without touchscreen
- normally: at end of the day write a report -> automatically compiling a daily report?
- engineers use at the moment office 365
- add pensioners and customers which can provide information and probably do a first inspection

problems

- remote locations: can't bring everything with him

most important part

start making pictures and annotating & putting in online to be able to share it.
